

# Agile Austin U - Class IV

## Estimation & Release Planning

Walter Bodwell, Planigle  
Yasser Farra, BancVue

October 7, 2013

# Schedule

09/16	Agile Values & Principles	David Hawks / David Merryweather
09/23	Scrum Overview & Roles	Kincade Park / Tracy Whitehill
09/30	Agile Requirements & User Stories	Earl Everett / Raje Siraj
<b>10/07</b>	<b>Release Planning &amp; Estimation</b>	<b>Walter Bodwell / Yasser Farra</b>
10/14	Sprint Ceremonies	Mark Spitzer / Lou Bailey
10/21	Scrum Simulation	Jason Morillo / Max Ekesi
10/28	Kanban & Lean Overview	Colin Turner / Ned Horvath
11/04	Agile Technical Practices	Eric Stewart / Mike Lepine
11/11	Retrospectives	Earl Everett / Yasser Farra

# Team Agreements

- Be on time
- Turn off / silence your cell phone
- Cancellations made 48-hours in advance
- Talkative people ask more questions to get the entire group talking
- One conversation at a time
- Positive comments are always welcomed
- Raise your hand to speak
- Quiet hand raise to grab attention after exercise

provided by

# Exercise: Forming

3 minutes

- Divide room into two halves
- Each half breaks into three teams
- Each team has a product owner
- Each team has a scrum master
- Each team has team members

# Identifying Your Teams

- The Right Size
- Able to get it done

# Divvying Things up

Bad

If each team misses one story in the release, the highlighted stories won't make it

Good

By better distributing stories amongst the teams, look which stories won't make it

# Exercise: Divvying Things Up

7 minutes

- Divvy the stories up among 3 teams
- Note: Ranking is on each story

# Walter Bodwell

- Doing agile since 1999
- Start ups / Enterprises
- Planigle – Consulting and Training
- Qcue – VP, Engineering
- Agile Austin - VP

# Yasser Farra

- Doing agile since 2007
- Four different companies (L, M, S)
- BancVue – Director of Engineering
- Agile Austin - Treasurer

# Goals of Estimation

- Understanding
- Identify Relative Cost

# Story Points

It is all relative

- Easy
- Not tied to people
- No padding
- Don't degrade
- Automatically adjust
- End to end

# Modified Fibonacci

# Types of Estimation

- Planning Poker
- Affinity Estimation

# Planning Poker

# Exercise: Planning Poker

15 minutes

- Pick a baseline story for the 3 teams
- Each team sizes the top half of their backlog using planning poker

# Affinity Estimation

# Exercise: Affinity Estimation

10 minutes

- Use the same baseline story
- Now estimate the other half of your backlog

# Velocity

# Velocity Across Teams

# What is Release Planning

- A plan to deliver incremental product value

## Goals

- Same page
- What is likely
- Balance load
- Predictability

# When To Do It

- Major features
- More than one iteration
- Predictability is important
- Urgency/Visibility desired

# When Not To Do It

- No track record
- Small features / enhancements
- Maintenance work
- Short releases

# What to Plan

- Feature Stories
- Related tech debt and defects

Story Task Defect Test

As an e.g. accountant , I want e.g. Quickbooks integration

Who What

so that e.g. I don't have to import CSVs daily .

Why

Add a description...

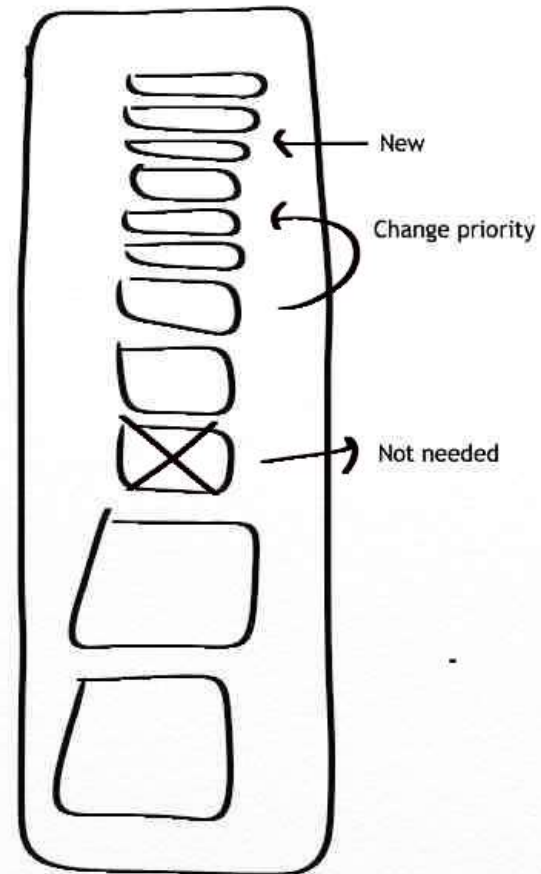

Tag this item.

Add to Backlog Cancel

Assigned to Nobody

# What NOT to Plan

- Other tech debt and defects

# Hardening Iterations

# Planning the Release

- Kickoff / overview
- Break out sessions
- Review results

## Deliverables

- Plan for each iteration
- Assumptions
- Dependencies
- Risks

# Dependencies

- Single team
- Do the work together
- Implement service first
- Stub out service

# Confidence – Fist To Five

# Exercise: Release Planning

20 minutes

- Assume 4 iterations
- Assume a velocity for each team
- Plan the stories out across your three teams
- Assumptions?
- Risks?
- Dependencies?
